

## Weird Science Gadget: Hidden Blade

A **Hidden Blade** is a concealed, spring-loaded weapon which extends from a specially designed bracer worn around the wrist. This weapon can be used to launch a devastating series of attacks against an unprepared combatant.

This weapon is difficult to notice when worn. The wearer must be searched and a **Spot Hidden** roll is required, opposed by the wearer's **Stealth** skill.

During a surprise attack, an attacker with a **Hidden Blade** may attempt **two attack rolls** instead of one (as per the **Shadow** talent, p.26 *Pulp Cthulhu rulebook*). An attacker with a **Hidden Blade** who *also* has the **Shadow** talent can attempt **three** such surprise attack rolls. A **Hidden Blade** causes the same damage as a **Medium Knife** (1D4+2+db).

**To build:** parts cost \$250, requires 1d10+5 days, and a successful combined **Hard Mechanical Repair** and **Hard Art/Craft (Leatherworker or Weaponsmith)** roll.
